To whomsoever it may concern

Date: 17th May 2024

Our collaboration with AKS Marine Pte Ltd since 2021 has been consistently rewarding. Mr. Saravanan and his team's expertise is evident in our recent endeavors on four VLCC projects: M/T San Ramon Voyager, Houston Voyager, London Voyager, and Singapore Voyager. Their work on various heat exchanges – plate, shell, and tube types – exemplifies their professionalism and adherence to Seatrium shipyard regulations, consistently delivering ahead of schedule.

The AKS team's proficiency was particularly notable during a critical phase with the M/T Singapore voyager. Faced with reefer condenser tube failures, they not only efficiently coordinated to procure spare tubes but also worked tirelessly through the night, demonstrating their unwavering dedication and commitment. Their prompt completion of the task ensured no delays to the project, for which we are grateful.

In summary, AKS Marine's heat exchanger services are cost-effective and reliably high in quality. Their commitment to Safety and excellence means that once they undertake a task, one can rest assured that it will be executed flawlessly.

Regards
